Project with other applications including Project Server, Visio, SharePoint, Excel, and Project Web App. * Extend the client-server model to share Project information and data with other applications. * Create custom client and server projects to extend Project Client to integrate with other applications. * Automatically configure Project projects to work with other business applications. Developers creating new project types and project applications can use the SDK to extend Project and project management capabilities. These new projects allow developers to integrate Project with other applications including Project Server, Visio, SharePoint, Excel, and Project Web App (PWA). New projects can also create custom client projects that extend Project Client to integrate with other applications. Every Project 2010 project has a structure that describes the common definitions and settings, and project data that can be used by the project. The XML schema for the project file is used by the developers to create, read, and update project data. The XML schema for the project file includes optional project data that the project developer can use to customize project definitions and settings. When a project is first opened, it can be configured for use in any of the 16 different Project-specific projects that can be created in the Project 2010 clients and Project Server 2010. Additional projects can be configured to work with other business applications. These other applications can be

The Microsoft Project 2010 (Beta) SDK package contains documentation, code samples, "How to" articles, and programming references to help customize and integrate the Project 2010 clients and Project Server 2010 with other applications for enterprise project management. The Microsoft Project 2010 (Beta) SDK is a release helps solution providers, value-added resellers, and other developers learn about new features in the Project Server 2010 platform, and how to extend and integrate Project Server 2010 with other applications for enterprise project management (EPM). It features conceptual and "How to" articles, sample code, and programming references for the Project 2010 clients and Project Server 2010. The pj14sdk_beta.exe download includes two HTML Help files: pj14SDK_beta.chm (conceptual topics and managed code reference), and pj14_ReportingDB_beta.chm (the Reporting Database Schema reference). The WINPROJ.DEV.hxs file is an update for VBA Help in Project Professional and Project Standard, along with instructions for installation. Additional references include the default Project Guide files, the XML schema for Project 2010, and the XML schema for the ChangeXML parameter for

Statusing methods in the Project Server Interface (PSI). The download also includes complete sample projects that relate to topics in the SDK. The BranchingWorkflow project uses Microsoft Visual C# and requires Microsoft Visual Studio 2010. The WCFHelloProject directory includes two samples. WCFHelloProject_Prog uses Visual Studio 2008 SP1 to programmatically set Windows Communication Framework (WCF) properties. WCFHelloProject_vs10_VfgEd uses Visual Studio 2010 to configure WCF properties with the app.config file. \$119.95 32 MB DESCRIPTION: Microsoft Project 2010 Software Development Kit Description: The Microsoft Project 2010 (Beta) SDK package contains documentation, code samples, "How to" articles, and programming references to help customize and integrate the Project 2010 clients and Project Server 2010 with other applications for enterprise project management. Fueling the Fire: Using Theatre to Address Race and Ethnicity in Medicine. In the United States, overt and subtle racism have led to race and ethnic disparities in numerous health outcomes. While various sources have described the outcomes of these disparities, the mechanisms underlying them are often left unexplained. Additionally, the standard of care for patients of diverse backgrounds is often omitted. By exposing students, residents, and practicing physicians to a multitude of stories and roles, theatre can help to break down traditional barriers among health care providers and improve trust between the various patient groups. In this article, the authors discuss the ways in which theatre can be used to address race and ethnicity in medicine. The Secretary is charged with
