Virtual Chess Clock With Product Key [32|64bit]

Virtual Chess Clock is a compact Windows application built specifically for helping you use a chess countdown timer. Although it was developed as a chess clock, you can use it to count your gaming sessions for other board games as well. Intuitive layout You are welcomed by a clean feature lineup where most of the operations can be carried out with minimal effort. Everything is kept as clear and simple as possible, so you can easily time your activities. Configuration settings Virtual Chess Clock gives you the possibility to switch to a full screen mode for a better focus on your work, reset the clock with just one click, pause the timer, as well as swap the players' names and time control parameters. What's more, you are allowed to choose between several different time displaying modes, specify the time for the left and right players, and type the players' names and reveal them in the primary panel. Another notable characteristic worth mentioning is represented by the possibility to select the hotkeys for the left and right players' buttons in order to pause or reset the clock, switch between users, and show seconds only if the time is less than a user-defined value. During our testing we have noticed that Virtual Chess Clock carries out a task quickly and without errors. It leaves a minimal footprint on system resources, so the overall performance of the computer is not hampered. Bottom line To sum things up, Virtual Chess Clock offers a handy set of dedicated parameters for helping you time your chess gaming sessions. Thanks to its intuitive layout, it is suitable for rookies and professionals alike. Virtual Chess Clock Key Features: A comprehensive set of features for your chess gaming sessions Quick and simple navigation Innovative time display mode settings Highly customizable for your convenience Easy to use and powerful Computer supports *Please note that Software is sent compressed and protected for security reasons.
