“name_of_file_recording_the_macros”_on_your_machine · Recorded macros can be stored and sent via email to another PC or copy/pasted to other programs. · You can learn more about how to use Virtual Programmable Keyboard on our website: · You can download Virtual Programmable Keyboard at: · Virtual Programmable Keyboard is a must have utility for everyone who needs to capture a series of keyboard and mouse actions. · You can submit your recordings and share them on our website: Requirements: · Windows XP, Windows Vista, and Windows 7 · Internet access · Virtual Programmable Keyboard is free of charge. · A PC with a microphone that you want to record hotkeys. Windows Downloads · Programmable Keyboard for Mac OS X · Software Package for Mac OS X Virtual Programmable Keyboard (Mac version) · Virtual Programmable Keyboard (Mac version) Download of any of the above may be subject to the terms and conditions of the end user license agreement accompanying the download. Download links for Windows and Mac are provided at the following: · Windows Website: · Mac Website: b7e8fdf5c8

Simply record any keystrokes that you perform to a single keystroke. You can combine to record multiple hotkeys in one stroke. The keystrokes can be recorded by using any of the hotkeys, including:

- Winkey + letter/number/symbol
- Winkey + F1 to F12
- Winkey + T to D
- Winkey + C to Z

Virtual Programmable Keyboard requires no effort on your part, there is no learning curve, no complicated set up, and no use of coding. It just works. You must select the hotkey that you want to record the macro for before you start typing. You can record multiple macros in a single session or send the macros separately to different keystrokes. Virtual Programmable Keyboard does not include editing functions. If you wish to edit your macros, the software requires an external converter. It does not require an activation key and its free to use!

- Right click on the keystroke and select "Record Hotkey"
- Press the hotkey that you want to record to (e.g. • WIN+F2 is selected
- Start typing the letter "w" The keystroke "w" is now recorded. Right click on the keystroke "w" and select "Record Macro" Now just type in the letter "i" The keystroke "i" is now recorded. This can be repeated for any letter/number/symbol. If you want to record multiple keystrokes to a single keystroke then just press the hotkey again (e.g. If only one keystroke is wanted then just select the keystroke. You can disable a hotkey that you no longer use, when you no longer use a hotkey then the hotkey can be disabled so you do not accidentally perform the action again when it is set to "Off".

One-time Registration/License Key.

- Virtual Programmable Keyboard is free to use (with no registration needed).
- Registration is needed only if you wish to use the Macro Editor.
- You can register Virtual Programmable Keyboard with an email address so we can send you a license key in case of not receiving an activation email. You will need to verify your email address by using the activation link sent in the email. You will then receive a license key within 24 hours. You need to activate the Macro Editor to be able to use it.
