Installation Guide How to
activate?Q: What are the
different grades that EmberJS
applications can use? I was
trying to build a rails
application and EmberJS and I
am stuck on how to use the
BackboneJS library. All I am
getting is the following error: {
 "timestamp":
 "2013-07-05T17:12:08.493Z",
 "status": 500, "error":
 "Internal Server Error",

```
"exception": "#, #",
  "exceptionName":
    "NoMethodError",
    "clientTraceId":
      "eSgzmEex2B",
"remoteAddress": "127.0.0.1",
"message": "Don't know how
to build task:my_task
(TypeError)", "messageStack":
  [], "serverName":
"dart/server", "stackTrace": []
```

} I would like to know what are the different types of EmberJS applications that exist, and also, how do I get my application to recognize

the BackboneJS? UPDATE: I did the following to include the Backbone.js library to my.html file: Which resulted in getting the following error: Failed to load resource: the server responded with a status of 500 (Internal Server Error) line 19: SyntaxError: expected expression, got ' 6d1f23a050
